# Take control with Summit Agro

## **Raze**<sup>®</sup> Herbicide

When excellent 1-hour rainfastness, superior compatibility, aquatic use registration and a sound environmental profile in a high-strength glyphosate formulation matters. For the control of a wide range of annual and perennial weeds. There is no need to add additional wetter/surfactants to Raze - always follow the label directions.

Unique technology exclusive to Summit Agro.

## **milbeKNOCK**<sup>®</sup> **NEW** Miticide

Milbeknock is a new miticide that controls European Red Mite and Two Spotted Mite in apples, pears and strawberries. It is effective against all mite growth stages, has a low mammalian and environmental toxicity profile, fits in with integrated mite management control and is effective on resistant mites.

APVMA registration pending, to be available in 2006.

## **Saprol**<sup>®</sup> Fungicide

When disease pressure is really on Saprol is proven to be the outstanding performer. A proven fungicide providing reliable control of Brown Rot, Blossom Blight of stone fruit, Black Spot, Powdery Mildew of pears and a range of diseases for ornamentals.

Saprol is a group C fungicide ideal for use as a foliar spray and a post harvest dip.

## **Ultiflora**<sup>™</sup> **NEW** Miticide for Ornamentals

Ultiflora is the new miticide that controls all stages of Two Spotted Mite in ornamentals including roses, chrysanthemums and carnations.

APVMA registration pending, to be available in 2006.

## **Pyranica**<sup>®</sup> Miticide

A proven, long lasting mite management product, Pyranica delivers an excellent fruit finish and provides long lasting control of mites at all stages of the life cycle. Proven powerful performance regardless of temperature and higher levels of compatibility with predatory mites.

Always follow your local mite resistance strategy.
